How to use Edimax IPCam Surveillance Viewer to access Edimax Cameras.

Introduction

Edimax IPCam Surveillance Viewer is a powerful tool to view up to 16 Cameras at a time. You can Pan/Tilt Edimax camera easily by clicking the camera image in the Grid.

Procedures

Step 1. Launch the IPCam Surveillance Software from your Start -> All Programs -> Internet Camera list

Step 2. Click on the Setup -> Configure Cameras.

Step 3. The Camera Search will search the Edimax cameras in local network. You can just select the camera in the list and then click on "Select". The information is filled out automatically. Click on OK.

onfigure Cameras	
Channel	Camera Schedule Recording Audio Motion Recording
Channel 1 Channel 2 Channel 3 Channel 4 Channel 5 Channel 6 Channel 7 Channel 8 Channel 9 Channel 10	Camera Configuration 1 Name Model IP Address Username Web Port 80 Password Reset
Channel 11 Channel 12 Channel 13 Channel 14 Channel 15 Channel 16	Camera Search Camera Name IP Model IG 856467 102 158 122 104 Edwarm IC7000DTN
	Select Refresh
	OK Cancel

Step 4. Done. You will see the camera showing up in the grid. Click on the image itself for Pan/Tilt the camera.

Here are some more information if you would like to use the IPCam Surveillance software to view the camera in a remote location.

First of all, make sure the port forwarding in the camera's location is done. You may refer another FAQ "How can I view my camera from a computer on Internet?"

Secondly, launch "IPCam Surveillance software" and go to "Setup" then "Configure cameras"

Thirdly, you may select the Camera number on the left. Enter all the information to access the Camera in remote location. Click OK.

hannel 2 nannel 3 hannel 4	Camera Configu	ration 2				
hannel 5 hannel 6	Name	frontdoor	Model			
hannel 7 hannel 8	IP Address	75.18.227.140	Username	admin		
hannel 9 hannel 10 hannel 11 hannel 12 hannel 13	Web Port	80	Password	••••	Reset	
hannel 14 hannel 15 hannel 16	Camera Search					
	Camera Name	e IP	Model			
			Select	Refresh		

Once you click OK, the camera in remote location shows up in the Grid. Mission complete!

Our powerful IPCam Surveillance Viewer can let you view up to 16 Edimax Cameras !
