## **Instruction**

## Get Smart iCatch View IP cameras from your iPhone or HTC Magic anytime and anywhere

Edimax iCatch is the best surveillance application for DIY security. This web-based viewer supports up to four channels and digital zoom in function. It also allows you to control IP cam mechanical Pan/Tilt function by clicking direction button.

All you need to do is to connect the Edimax Cameras to your network environment, insert the camera names, passwords and IP addresses, and place the four IP Cameras at the locations you would like to view. Then, you are ready to view the real-time images anytime and anywhere with the iCatch running on your iPhone.

This application is verified on iPhone (Safari) & HTC Magic (Android)

- 1. At this moment, it is needed that IC-7000PT/PTn V2 shall be the host IP Camera for this application.
- 2. Upgrade F/W V1.37 onto IC-7000PT/PTn V2

3. Open Safari browser

4. Input IP Cam's (IC-7000PT/PTn V2) IP address

192.168.x.x/ipcam.asp

*Note: "/ipcam.asp" is needed* 

5. Input the user name & password of the IP Cam (IC-7000PT/PTn V2). After that, please click log in.
